OVERVIEW

Agency Payroll is responsible for reviewing employees that work and/or live in a state other than WI. Depending on each employee's situation, Agency Payroll may need to manually update tax fields in STAR HCM to ensure taxable grosses and withholding are applied to the correct state.
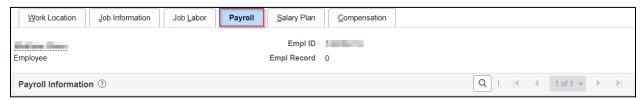

This job aid is designed to assist with the review and update process for new hires and current employees with an out-of-state residence and/or work location. If tax updates are not entered timely due to employer error, notify Central Payroll to determine if year-to-date tax corrections are necessary.

Employees may update their own state taxes if submitting a WT-4 for WI tax withholding. All other states require a paper form submitted to Agency Payroll (See Out of State Employee Set Up - Agency Guide).

    a. **Navigation:** Workforce Administrator Homepage > Payroll Dashboard > Payroll Processing Tile > Employee Data Folder > Job Data.

3. Review **Tax Location Code** field to verify employee's work location.
    a. HEADQTR – Employee only works out of headquarters location.
    b. MIXED – Employee works partially remote and at headquarters location.
    c. REMOTE – Employee only works remote at home address.

NOTE: If the **Tax Location Code** does not match employee's work arrangement or is an obsolete code, notify agency HR to add a **Job Data** row using **Data Change / Update Tax Location**.

   a. NO TAX TABLE – Employee's **Home Address** state is a state that has no tax table set up in the system. If permanently working in this state, refer to Scenario 9 in the *Out-of-state Tax Scenarios* section.

   b. HOME STATE, TAX RES MISMATCH – Employee's **Home Address** state and **Tax Resident** state do not match. These two should match <u>unless</u> the home address is not the employee's legal residence, or the employee lives in a reciprocal state and works in WI with no W-220 filed. Refer to the *Out-of-state Tax Scenarios* section if updates are needed.

   c. INVALID UI JURISDICTION – Employee's **UI Jurisdiction** state is <u>not</u> WI. This should be WI regardless of the legal residence and work location.
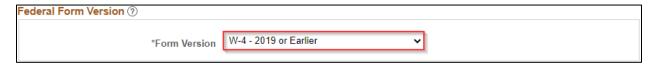

3. Contact employee to verify legal residence, work location and telework arrangement if necessary. Provide appropriate tax form(s) to complete.

4. **If Telework Arrangement** is blank, notify agency HR to update the **Tax Location Code** in **Job Data** to 'HEADQTR', 'MIXED', or 'REMOTE' using **Data Change / Update Tax Location**.

5. Update **Home Address**, **Tax Resident** and/or **Tax Distribution** if necessary.

GLOSSARY

Domicile

A "domicile" is a person's true, fixed, and permanent home where a person intends to remain permanently and indefinitely and to which a person has the intention of returning, whenever absent. It is often referred to as "legal residence."

Legal Resident

A legal resident of Wisconsin is a person who maintains his or her domicile in Wisconsin, whether s/he is physically present in Wisconsin or living outside of the state.

Non-reciprocal State

A state with which Wisconsin does not have a reciprocity agreement so residents of this state working in Wisconsin may be subject to income tax laws of both states.

Reciprocal State

A state with which Wisconsin has a reciprocity agreement so that residents of this state working in Wisconsin will be taxed on income earned as an employee by their home state and not by Wisconsin.

Tax Data

A STAR HCM page used to determine the Federal and State withholding rate applied to earnings, unemployment reporting location, and residency for additional earnings reporting and tax withholding (when applicable).

Tax Distribution

A STAR HCM field that populates the tax state on an employee's pay lines. The state defaults to WI based on the Tax Location code in Job Data. It should match the employee's primary work location.

Tax Location Code

A STAR HCM field that defines an employee's telework arrangement as Headquarter Location, Remote or Mixed.

Tax Reciprocity Agreement

An income tax agreement between two states that prevents the same income from being subject to tax by more than one state.

Tax Resident

A STAR HCM field that determines the application of state tax withholding in conjunction with Tax Distribution. The state defaults to the first home address entered in the system on or prior to the hire date. It should usually match the employee's home address.

Telework Arrangement

A work flexibility arrangement under which an employee performs the duties and responsibilities of his/her/their position, and other authorized activities as determined by the supervisor, from an approved alternate worksite other than the employee's primary main office, one or more days per week on a standard and recurring basis.

UI Jurisdiction

A STAR HCM Field that determines the application of employer unemployment tax. The state defaults to WI for all employees. This state should always be Wisconsin regardless of work location.

Work Location

A worksite where employee performs their work duties. This is determined by the STAR HCM Location, Tax Location Code and/or home address.
