Introduction

The State of Wisconsin Student Diversity Internship Program (SWSDIP) focuses on historically underrepresented workforce populations and provides students with practical on-the-job experience, training, and exposure to the state's workforce.

Since the inception of the original program in 1974, the objective and commitment to students, agencies, and diversity have remained solid. The Bureau of Equity and Inclusion (BEI) constantly seeks ways to improve our outreach and overall program to ensure a productive and great experience for all participating entities.

The 2022 State of Wisconsin Student Diversity Internship Program (SWSDIP) placed 148 students into internship positions with 19 participating state agencies. The hires included 107 women, 62 people from a racial and ethnic minority background, four veterans, and 19 people with disabilities. The program received 2,451 applications, averaging three positions applied for by each eligible student, with 845 eligible applicants competing for 120 available jobs.

BEI staff contacted local and regional college and university career placement centers, affinity groups, student unions, and Historically Black Colleges and Universities (HBCUs) nationwide. The efforts of the BEI team extended to faith-based organizations, high schools, and a variety of community-based organizations. BEI hosted several virtual hiring events on Handshake and facilitated several live Microsoft Teams events to bring awareness to and assist interested parties through the application process. The Microsoft Teams events were recorded and placed on the SWSDIP website.

The 2022 SWSDIP achieved the following:

• The number of eligible applicants increased from 797 in 2021 to 845 in 2022, a significant increase from the 376 in 2019. This increase is substantial and correlates with the inclusion of this program in state agencies' 2020 El Strategic Plans.

2019	2020	2021	2022
376	534	797	845

• The program has experienced consistent increases in applicants from racial and ethnic minority groups over the past four years, as reflected in the table below:

201	9	2020	2021	2022
103		164	231	242

- The program has had a steady increase in agency participation and positions available. There was an increase in participation from 8 state agencies in 2019 to 16 agencies in 2021 and 19 state agencies in 2022.
- Applicant surveys provide helpful information and recommendations to improve the student application experience. The average score was 4.24 out of 5 for overall satisfaction with the process, see Appendix A.
- In the 2022 SWSDIP exit survey, the program received an average response of 4.64, with students saying they felt welcomed in the work environment, see Appendix B.

The Student Diversity Internship Program provides students with valuable, paid work experience and training in various branches of state government over the summer break. Some interns have obtained employment in state government as limited-term or permanent state employees.

Students also participated in a summerlong project designed to provide them with an opportunity to share their work and learning experiences with the other students. Here is what one student said about working at the Department of Corrections:

"... this internship was one of the most eye-opening experiences I have ever had. I was introduced to a whole new world that has been right in front of me for years, all without me ever realizing...I have already started to develop so many new skills...The people skills and impromptu thinking skills that I have gained through this internship will be helpful not only to my future careers, but also in my future life in general... I am proud of many things that I have completed through this internship. This internship has changed the way I see not only the Department of Corrections, but the world around me as a whole...I could not be happier with my internship experience and the connections that I made this summer." Intern, Luedtke, Brock 2022

2022 Process Overview

BEI began asking for position submissions from the enterprise on September 30, 2021. BEI received 119 positions from 19 different boards and agencies, representing 27 job groups and 120 hiring opportunities. BEI then compiled all position submissions into the 2022 State of Wisconsin Student Internship Position Catalog and posted it on the SWSDIP website and Wisc.Jobs. The application period opened on December 6, 2021, and closed on January 31, 2022. Interns submitted a single application for the program and resume, selecting up to five (5) positions from the catalog.

BEI and the Bureau of Merit and Selection collaborated to sort the applicants into position lists. At the agencies' request, BEI provided these lists to each agency coordinator for further screening before the agency scheduled interviews. BEI communicated a recommended interview timeline of February 14 – March 18 with an internship start date of May 22.

After sending out the candidate lists, BEI offered to support agencies with involvement in the hiring process, but agencies preferred to manage this without assistance. During the hiring period with the agencies, BEI received many inquiries from internship applicants regarding the status of their applications. All questions were forwarded to the agency. Some candidates reported delayed responses or a need for more communication from agencies.

Improvements Implemented in the 2022 SWSDIP Cycle:

Outreach

Student outreach and recruitment have demonstrated continuous increases in students from racial and ethnic minority backgrounds. Individual outreach and engagement with student groups on campus and using the recruitment application, Handshake, were added as recruitment tools, although it is premature to directly connect increases in minority participation to adding these recruitment tools for this report. Although the percentage of minority groups has continued to increase, the goal is to have at least 50% of the applicants in this category. In 2022 we reached 29%:

Applicant Metrics	2021	2022	Year Change
Total Applicants	797	845	▲ 7%
Women	521	549	▲6%
Racial or Ethnic Minorities	231	242	▲ 5%
Veteran Students	17	12	▼29%
Students with Disabilities	53	80	▲ 53%

Communication and Hiring Process

Many applicants reported experiencing long periods without communication regarding the status of their applications after BEI provided the list to the agency. Further, some agency requests for interviews were going to spam mail because of unidentifiable third-party names on the emails. Multiple methods of responding to students' questions about what was going on with their applications created additional waiting time. Several students commented that they missed the interview request because it went to spam, and they received no communication or second opportunity to respond. Many students reported receiving an interview request in mid-to-late May from the agencies. Students requested more consistent communication channels and procedures across agencies with the students.

The applicant hiring data reveals that students of color applied to the program, but the same level of candidate diversity was not reflected in those ultimately hired across the enterprise. White women are the highest group hired in this program, representing 72% of the total hires.

Timeline

Most agencies committed to participating by providing intern jobs and a commitment to increase diversity in their Equity and Inclusion Strategic Plans. With this agency commitment, BEI began soliciting positions for the program in September 2021, with a deadline for agency submission of November 12, 2021. BEI published the position catalog and opened the application period in early December 2021. The application period closed in mid-February 2022, and BEI staff worked with agencies to support interviews from the interview list provided or reviewed agency screening development to ensure screen criteria aligned with the expectations for the intern positions. Interviews were scheduled for March 1 through April, with job offers made by mid-April and early May. BEI will continue to work with agencies to identify options for streamlining the recruitment and hiring for this program.

Improvement Opportunities Moving Forward:

Outreach

The outreach and recruitment strategies implemented for the program have been successful, with a measurable increase in program awareness, applications, and diversity. The current application percentages for the program for students of color align with the population percentages for Wisconsin. The recent census demographic reports note continued significant changes in the diversity of the state's population. With that in mind, BEI will continue to expand its presence on virtual platforms and outreach events like virtual career fairs and campus career fairs in the Fall and Winter terms before the start of the application period. BEI will continue to add to the list of outreach agencies, including local and regional colleges and universities, career placement centers, affinity groups, student unions, faith-based organizations, and community-based agencies with direct and indirect contact with traditional and non-traditional students. BEI will continue to expand outreach to HBCUs nationwide. The Bureau will also communicate the importance of supporting a thriving enterprise internship program focused on increasing diversity rather than creating agency-specific, competing programs. Based on student feedback, the most important aspects of recruitment are ease of the process and effective communication during outreach.

Communication and Hiring Processes

To achieve consistency in communication with applicants and to address the disparate impact of secondary screening on candidates of color, BEI will create and implement a standardized communication and screening process for all applicants. Additionally, BEI will continue to offer to conduct all post-application screens and provide interview lists to agencies rather than lists of applicants who applied. BEI will offer to review questions used in the interview process to ensure applicability to the position, and screen for unconscious bias. Communications from BEI will go out to hiring managers in addition to coordinators. This change will allow BEI to help coordinate regular communication between the hiring managers and coordinators regarding program goals and process timelines. This change will also support consistent and timely communication of the interview process and job offers to applicants.

Several state agencies have included SWSDIP in their EI Strategic Plans, and BEI has experienced increased agency participation; however, it is essential for agency leadership to support the program, specifically the importance of synergy, efficiency, and quality of the experience in delivering this program. The students participating in this program are the future workforce for the State of Wisconsin, and the State is competing with other states and programs for these talented individuals. The global economy and advancing technology have created endless opportunities. Students have shared that the critical factors in choosing their places of employment are working in inclusive environments where they feel they belong and in an industry that believes in work-life balance with options for remote work.

Timeline

BEI recommends agency hiring managers interview and extend offers to potential interns in early spring. During the listening session and reflected in the subsequent intern survey, the overwhelming majority of interns agreed that the open application period should have ended in February rather than January. Additionally, interns would have preferred to have interviews in February or March, with a job offer by April. While the State of Wisconsin was their desired internship, many students reported that they struggled with accepting other internships offered, due to the late timing of the State internship offer (late April or early May) and inconsistent or timely communication from HR and agency hiring staff. Additionally, a significant number of minority candidates dropped out of the hiring process by the time they were invited for an interview.

2022 Metrics

State of Wisconsin Student Diversity Internship Program - 2022 Metrics

Applications	Applicants	Hires Made	Total Positions Filled
2,451	845	148	120

Two of the hires made were outside the SWSDIP 2022 applicant pool and are not included in the applicants and applications.

There were two applicants who each accepted two SWSDIP positions. The count of hires made is the count of people in jobs. The 148 hires made consisted of 146 people.

Positions Submitted	Positions Submitted Filled	Positions Cancelled	Total Positions Filled	Positions with Hires	Positions Cancelled
190	119	71	120	63%	37%

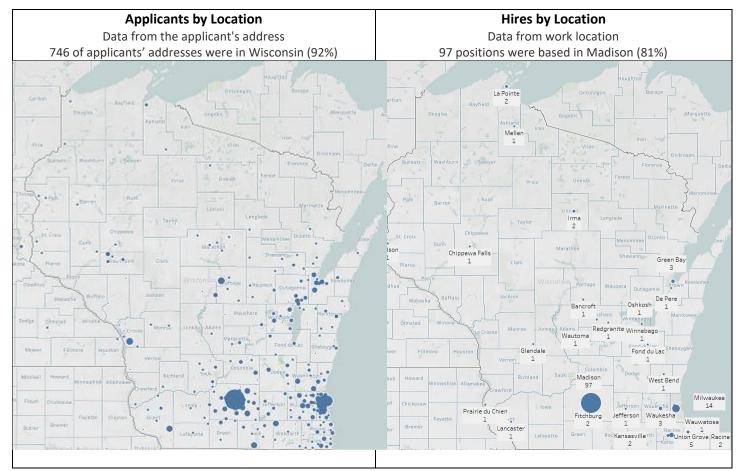

During the application process, one position was added (DHS – Policy, Planning & Research).
